

EDUCATION

Kennesaw State University

B.S. in Software Engineering

Kennesaw, Georgia

August 2026

Dean's List | Relevant Coursework: Object-Oriented Programming, Data Structures, Relational Databases, Unit Testing

EXPERIENCE

AI Trainer – Software Engineering / Coding Domain

January 2026 – Present

Handshake AI Fellowship

- Evaluated and scored frontier LLM responses on software engineering tasks; authored detailed rationales and comparative evaluations.
- Maintained high inter-rater agreement; contributed production-quality human-feedback data to improve AI coding assistants.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Node.js, React, JUnit, RESTful APIs

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, AWS Lambda, Railway

Tools & IDEs: Git, VS Code, IntelliJ IDEA, Claude API, GitHub Copilot

PROJECTS

Job Tracker – Full-Stack Job Application Tracker

2026

Java, Spring Boot, PostgreSQL, React, Docker, Claude API

- Built a full-stack job application tracker to centralize and streamline my job search, developing a Java/Spring Boot REST API with PostgreSQL persistence and a React (Vite) frontend with full CRUD functionality and client-side routing.
- Integrated the Claude API via a custom Spring Boot endpoint to auto-compare uploaded resumes against pasted job descriptions, surfacing structured match/gap analysis; containerized with Docker and deployed to Railway for public access.

Kubernetes Enterprise Capstone – Microservices Platform

2026

Kubernetes, Docker, Helm, ArgoCD, GitHub Actions

- Architected a production-grade Kubernetes cluster hosting a 3-tier microservices app, implementing least-privilege RBAC, NetworkPolicies, and Pod Security Standards to harden the cluster against enterprise compliance requirements.
- Built a GitOps CI/CD pipeline with ArgoCD, GitHub Actions, and Helm to enable zero-downtime rolling deployments; integrated Trivy vulnerability scanning and Prometheus/Grafana dashboards for real-time observability.

Fiscal Tracker – Accounting Web Application

2026

JavaScript, AWS Lambda, RESTful APIs, Role-Based Access Control

- Collaborated on a 4-person Agile team to build a full-stack financial management app, delivering a role-based dashboard for 3 user types (Administrator, Manager, Accountant) with real-time ratio calculations (Current Ratio, ROA, ROE).
- Implemented granular role-based permissions, suspension scheduling, and automated email notifications via AWS Lambda, reducing manual account-administration effort for admins.

OPEN SOURCE CONTRIBUTIONS

GIMP Metadata Editor – Creative Commons Licensing

2026

C, GTK, gexiv2

- Partnered with GIMP's open-source maintainers on a 4-person team to scope a Creative Commons licensing feature for GIMP's metadata editor, translating maintainer requirements into a technical implementation plan.
- Implemented the feature in C using GTK and gexiv2 to embed XMP metadata, shipping a tool that lets artists check, edit, and apply multiple copyright license types directly within GIMP.

ACTIVITIES & LEADERSHIP

Head Coach, Kennesaw Youth Basketball League

Nov 2023 – Feb 2024

Kennesaw, Georgia

- Led team of 8 athletes (ages 10–12) through full competitive season; developed coaching, communication, and leadership skills.
